Product Description

Docking Station USB Multi Hub PD100W 4K HDTV VGA 3.0 Type C 3.0 Concentrator Adapter Splitter USBC Dock

A Docking Station is a peripheral device used to connect a laptop or tablet computer. It can provide additional connection ports and expansion functions. The following are the main features and application scenarios of Docking Station:

1. Expansion of connection ports

A single Docking Station can be used to expand multiple USB, HDMI, Ethernet and other interfaces to facilitate the connection of external devices.

Supports simultaneous connection of multiple monitors to achieve multi-screen display.

2. Power supply

Built-in power adapter can provide power supply and charging functions for laptops.

Some high-end Docking Stations also support power supply through USB-C interface.

3. Data transfer

Fast data transfer and synchronization through high-speed USB, Thunderbolt and other interfaces.

Conveniently connect external storage devices, printers and other peripherals on the desk.
