Product Description

Customized White USB 2.0 Cable Type-C To Lightning For iPhone Charging

Connector type:

Type-C: One end is the Type-C interface, which is the most popular USB interface type at present. It has the advantages of small size and reversible plug-in design.

Lightning: The other end is Apple's proprietary Lightning interface, which is used in devices such as iPhone, iPad and iPod. The Lightning interface is Apple's unique data cable interface and is only applicable to Apple products. In contrast, the Type-C interface has a wider range of applications and can be used by all digital products that support Type-C. This reflects the exclusivity of the Lightning interface.
