## Product Description

### Magnetic USB 3.0 Cable USB AM TO Type-C For Iphone 12 13 14 15 Pro Max

No front or back insertion: A common feature of the Type-C interface and the Lightning interface is that they are both front and back, which means that users do not need to worry about the direction of the socket when using it, providing convenience. Designed for Apple products: The Lightning interface is a data cable interface unique to Apple and is only applicable to Apple products. In contrast, the Type-C interface has a wider range of applications and can be used by all digital products that support Type-C. This reflects the exclusivity of the Lightning interface.
