Product Description

Wide Compatibility 30HZ 4K HDMI 1.4 Cable Cable High Speed Type C To HDMI Cable

The features of HDMI 1.4 Cable Type-C to HDMI mainly include support for high-definition resolution transmission and certain compatibility. This connection method can transmit high-definition video and audio signals to meet basic home entertainment needs. Specifically, the video resolution and frame rate supported by the HDMI 1.4 standard are subject to certain restrictions, but it can still provide a good visual experience.

Features:

Type-C (or USB-C) is a type of reversible USB connector used on many modern devices.

Type-C ports can support HDMI Alt Mode, which allows a Type-C port to output HDMI video and audio signals.

A Type-C to HDMI cable or adapter can be used to connect a device with a Type-C port to an HDMI display or TV.

The HDMI signal transmitted over Type-C will match the HDMI version supported by the Type-C port, which is often HDMI 1.4 or HDMI 2.0.
