Product Description

OEM 60HZ 4K HDMI 2.0 Cable Type-C TO HDMI Support Audio Transmission

Type-C to HDMI 2.0 cable plays an important role in many scenarios, such as conference presentations, home theaters and gaming entertainment, supporting 4K resolution, ensuring clear presentation content, as well as providing cinema-level viewing experience and better gaming experience. This cable was originally designed to achieve better video and audio effects, especially in applications that require high refresh rates, such as gaming and professional video editing. The HDMI 2.0 interface supports a refresh rate of up to 60Hz, while the Type C interface can transmit 4K video signals, but the refresh rate is usually only 30Hz. Therefore, by converting the Type C interface to an HDMI 2.0 interface, better high-definition output can be achieved.

Features:

1. Interface type: USB Type-C interface on one end and standard HDMI interface on the other end.
2. High-definition transmission performance: Supports video resolution up to 4K@60Hz and HDR, capable of transmitting high-quality video and audio.
3. High-bandwidth support: The maximum transmission bandwidth is 18Gbps, which is sufficient to meet the transmission requirements of high-definition videos such as 4K@60Hz and 60fps 3D.
4. Wide compatibility: Can connect various devices that support HDMI 2.0 and USB Type-C interfaces, such as smartphones, tablets, laptops, TVs, etc.
