Product Description

Customize USB To RJ45 Converter Customized Color And Logo

USB to RJ45 Converter, as the name implies, is a converter that converts USB interface to RJ45 interface, which can connect USB-supported devices to wired networks. It usually has the following features:

1. Interface type:

USB interface: used to connect devices that support USB interface, such as laptops, desktop computers, mobile phones, tablets, etc.

RJ45 interface: used to connect network cables, which can be connected to network devices such as routers and switches.

2. Data transmission speed:

Gigabit network speed: Most USB to RJ45 Converters support Gigabit network speed and can provide high-speed network connection.

10G network speed: Some high-end models of USB to RJ45 Converters support 10G network speed, which can meet higher bandwidth requirements.
